

Submitted by: Aditya Shelar(11012404)

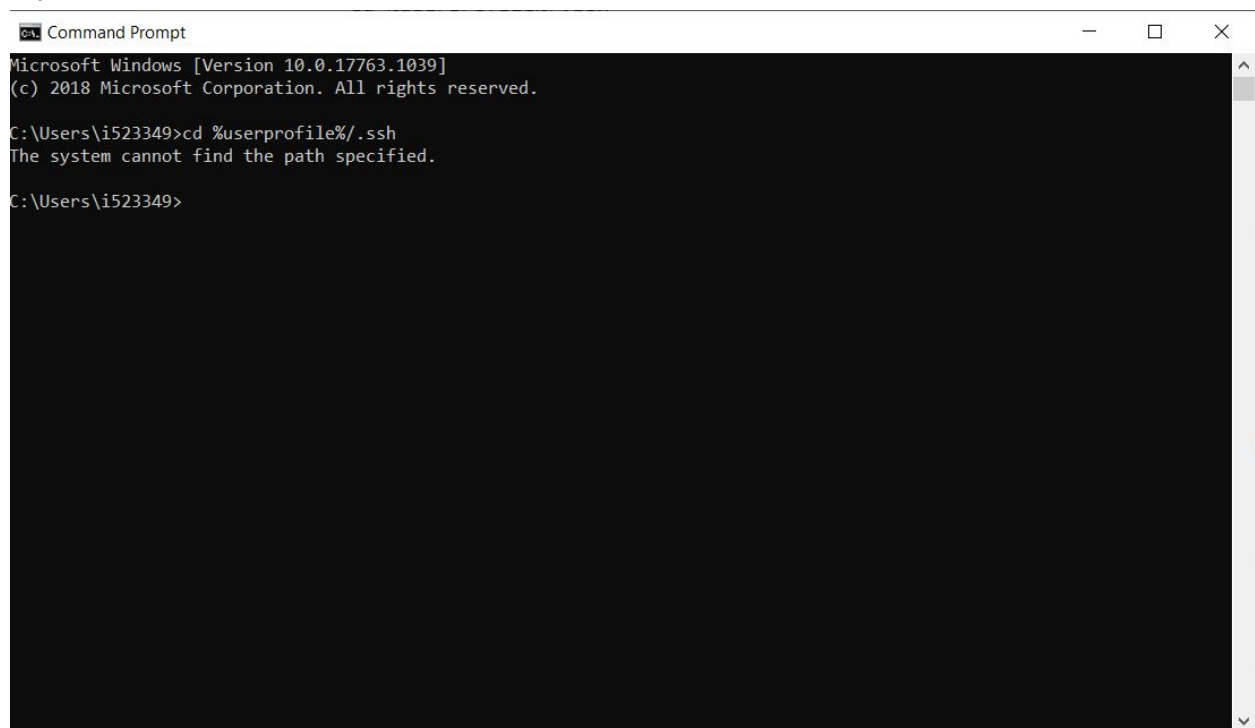

Task 1 - Git CLI Assignment

1. Create a git repository on any git server (GitHub, Gitlab or Bitbucket). Find out what an SSH key is. Add an SSH key to the git server. Provide evidence that the SSH key is working properly.

Step 1: Checking for existing keys

Open Command Prompt, and input the command `cd %userprofile%\.ssh`

In my case, as there are no ssh keys existing in the system. I will now try to generate a new ssh key.

```
Command Prompt
Microsoft Windows [Version 10.0.17763.1039]
(c) 2018 Microsoft Corporation. All rights reserved.

C:\Users\i523349>cd %userprofile%\.ssh
The system cannot find the path specified.

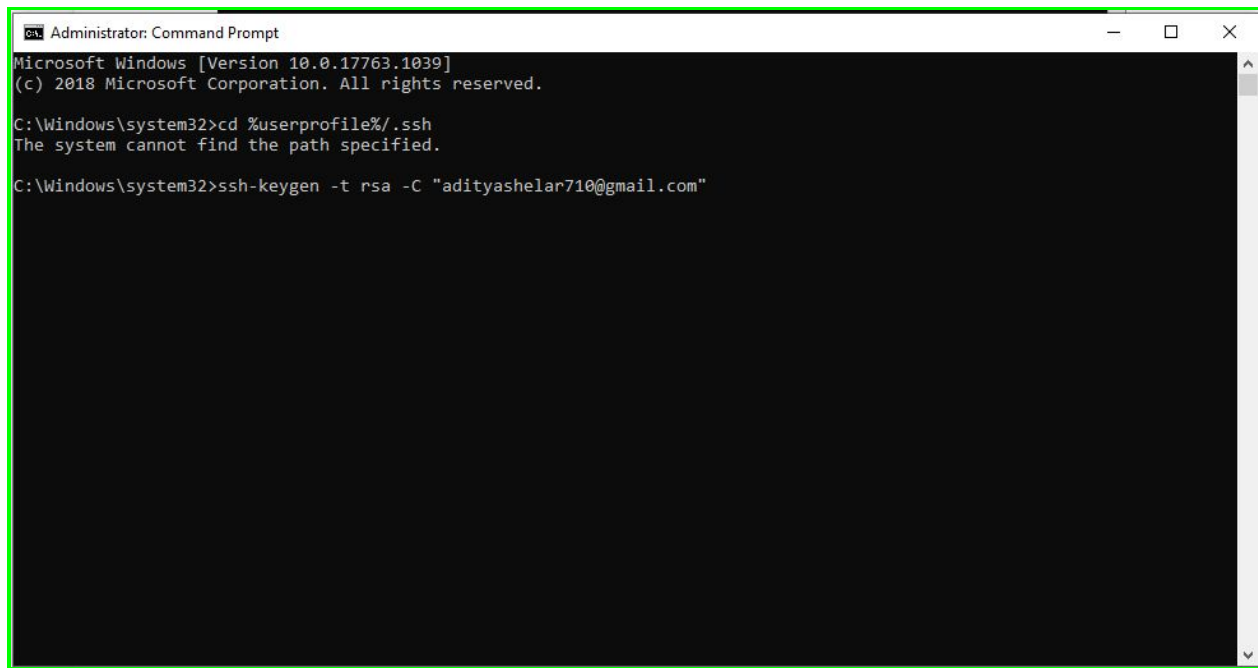

C:\Users\i523349>
```

Step 2: Generate ssh key

For generating ssh key, use the command `ssh-keygen -t rsa -C "your_email@example.com"`

In my case, the command will be related to my email id shown as follows:

`ssh-keygen -t rsa -C "adityashelar710@gmail.com"`

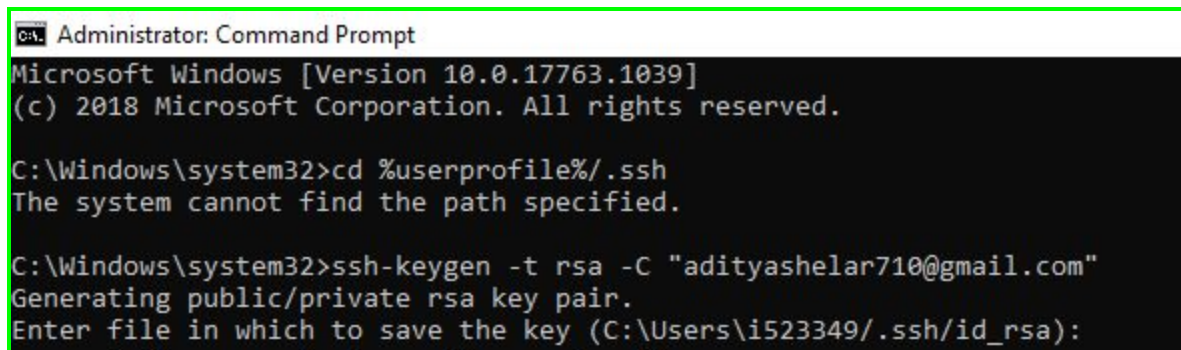

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.17763.1039]
(c) 2018 Microsoft Corporation. All rights reserved.

C:\Windows\system32>cd %userprofile%\.ssh
The system cannot find the path specified.

C:\Windows\system32>ssh-keygen -t rsa -C "adityashelar710@gmail.com"
```

Once you enter the command, you will be asked for a path where you want to store your key.

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.17763.1039]
(c) 2018 Microsoft Corporation. All rights reserved.

C:\Windows\system32>cd %userprofile%\.ssh
The system cannot find the path specified.

C:\Windows\system32>ssh-keygen -t rsa -C "adityashelar710@gmail.com"
Generating public/private rsa key pair.
Enter file in which to save the key (C:\Users\i523349\.ssh/id_rsa):
```

Press 'Enter' to save the default path.

The ssh key is generated in the path you mentioned.

Please see below screenprint

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.17763.1039]
(c) 2018 Microsoft Corporation. All rights reserved.

C:\Windows\system32>cd %userprofile%\.ssh
The system cannot find the path specified.

C:\Windows\system32>ssh-keygen -t rsa -C "adityashelar710@gmail.com"
Generating public/private rsa key pair.
Enter file in which to save the key (C:\Users\i523349\.ssh/id_rsa):
Created directory 'C:\Users\i523349\.ssh'.
Enter passphrase (empty for no passphrase):
Enter same passphrase again:
Your identification has been saved in C:\Users\i523349\.ssh/id_rsa.
Your public key has been saved in C:\Users\i523349\.ssh/id_rsa.pub.
The key fingerprint is:
SHA256:Fnap3KsTyxLFhU/Co2ka/aK/9LWw28hLD0IwGRaVknI adityashelar710@gmail.com
The key's randomart image is:
+---[RSA 2048]-----+
| .o.. .+o+. |
| .+E. oOoo |
| ooo .+. =.. |
| . .. * ..o |
| o .+. +S+ |
| +..O+* |
| ...O+.. |
| .. + * . |
| .o.Boo |
+---[SHA256]-----+
C:\Windows\system32>
```

For adding the key to your github account, you need to copy the content of pub version of the key and add it to your github account through **Settings > SSH and GPG keys > New SSH key**

SSH keys / Add new

A1laE3h adityashelar710@gmail.com

Add SSH key

You will be asked to confirm your github password to add the key.

Confirm password to continue

Password [Forgot password?](#)

Confirm password

Tip: You are entering [sudo mode](#). We won't ask for your password again for a few hours.

Once the authorization is done, your key is added successfully. Please refer below screenprint.

SSH keys

[New SSH key](#)

This is a list of SSH keys associated with your account. Remove any keys that you do not recognize.

My Key
54:f8:b6:6f:49:2f:58:d1:88:ed:bf:51:e1:ec:bf:15
Added on Mar 1, 2020
Never used — Read/write

Delete

Check out our guide to [generating SSH keys](#) or troubleshoot [common SSH Problems](#).

GPG keys

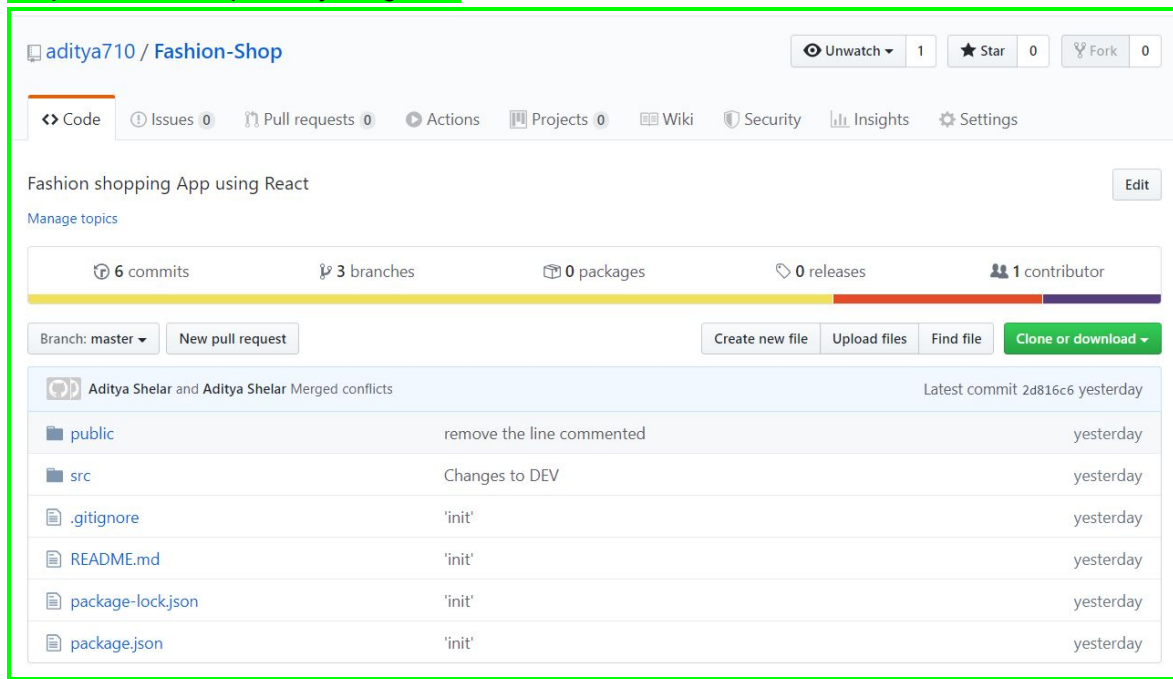

[New GPG key](#)

There are no GPG keys associated with your account.

Learn how to [generate a GPG key and add it to your account](#).

2. Create a local repository like taught in the class. Push all the code to your git server.

Step 1: Create repository on github

Step 2: Initialize the local repository

Once the repository is created, initialize an empty repository in your project folder using `git init` command.

```
C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git init
Initialized empty Git repository in C:/ADITYA/Usability Testing and Verification/Fashion Shopping App/fashion/.git/
C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>
```

Step 2: Add all the files and commit

You need to add all the files before you commit the files to the server. This can be done using `git add .` command which adds all the files and then you can commit all the files using command `git commit -m 'init'`, where -m stands for commit message and later message is written.

```
C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git status
On branch master

No commits yet

Changes to be committed:
  (use "git rm --cached <file>..." to unstage)
    new file:   .gitignore
    new file:   README.md
    new file:   package-lock.json

 create mode 100644 src/setupTests.js

C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>
```

3. Create at least 2 branches, change code and push your code to git server.

Step 1: Create 2 branches

You can create branches using the the command `git branch branchName`, where branchName is the name of the branch.

```
C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git branch Dev
C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git branch Test
```

To switch to a particular branch, you can use the command `git checkout branchName` and you will be switched to that branch as shown below.

```
C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git checkout Dev
Switched to branch 'Dev'

C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>
```

Step 2: Push code to branches

Now i push all my code to both the 'master', 'Dev' and 'Test' branches using the command: `git push -u origin 'branchName'` and all the code gets pushed to both the branches as shown below.

```
C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git push -u origin master
Enumerating objects: 22, done.
Counting objects: 100% (22/22), done.

 * [new branch]      Test -> Test
Branch 'Test' set up to track remote branch 'Test' from 'origin'.
```

4. Merge branch changes to master. Learn what merge conflicts are. Change code in one/more of your branches so that it creates a conflict while trying to merge with master branch. Resolve this merge conflict on CLI. Push changes.

Step 1: Merge changes from 'Dev' branch to 'master' branch

You can merge the code from 'Dev' to 'master' using the command `git merge branchName` and the code from branchName gets merged to 'master' branch

```
C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git checkout master
Switched to branch 'master'
Your branch is up to date with 'origin/master'.
```

```
C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git merge Dev
Updating c0b52dc..e84c220
Fast-forward
 src/App.js | 1 +
1 file changed, 1 insertion(+)
```

Step 2: Resolving conflicts while merging

I change the code in a single file twice so as to create the conflicts while i try to merge the code with master. You can see below there are conflicts shown while i try to pull the code for 'Dev' branch as the code on server is different and my 2 changes are different.

```
C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git add .

C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git commit -m "Change in Master Code"
On branch master
Your branch is ahead of 'origin/master' by 1 commit.
  (use "git push" to publish your local commits)

nothing to commit, working tree clean

C:\ADITYA\Usability Testing and Verification\Fashion Shopping App\fashion>git push -u origin master
Total 0 (delta 0), reused 0 (delta 0)
To https://github.com/aditya710/Fashion-Shop.git
   c0b52dc..e84c220  master -> master
Branch 'master' set up to track remote branch 'master' from 'origin'.
```

```
